Purchase and Delivery Specifications

Hello and thank you for your interest,

To make a purchase or enquiry, ask a question or request a commission please send an email to hgaved.studio@outlook.com. When you are enquiring about a specific piece please include the title of the piece.

All sculptural pieces presented on shelves can be supplied without or with display shelf free of charge, a small additional fee would be added if needed to cover any additional shipping and packaging costs that may incur. This price will vary on the size of the shelf and distance of delivery.

All lighting pieces will be supplied with fittings, brackets, cordage and lightbulbs. If you wish for the light to be used as a pendant appropriate fittings and ceiling mounts will be supplied instead of wall brackets. If you have specific intentions of cord type or length and plug fitting or to have a light switch incorporated or any other variations please feel free to enquire further as I will be very happy to try to accommodate any specific needs.

The lighting mounted on the steel sheet frame will come as so- there are specific ways of mounting these pieces to the wall which I can discuss further. Again variations or specific situations may require alternative approaches which I would very much be happy to discuss solutions and ideas for if needed.

All pieces are made with cement, sand and water. Most of the sculptures have used fibre reinforcement and all of the lights are fibre reinforced with glass fibres.

The metal on display is either stainless or mild steel and been sealed with liquid paraffin. The sculptures will be delivered sealed with a food safe sealant that can withstand up to 2000 degrees centigrade. Upkeep is needed annually or bi-annually and very minimal, this can all be discussed further at your leisure so please feel very welcome to contact me.

Many thanks,

Harry Gaved
